

## Plastic Injection Molding in San Luis Potosí, México

AZPotosina Plastics started its operations in February of 2005 with Canadian capital. It is a company focused on molding precision parts based in San Luis Potosí.

We have the commitment of meeting the requirements from our clients in Quality, Cost, Service and On Time Delivery.

Our entire staff has more than 14 years of experience in the plastic industry. We have the resources for running 7 days, 24 hours in 4 shifts.

AZPotosina is currently producing single injection, co-injection, and insert molded parts. These abilities allow us to service different kind of industries such as Electrical Appliances, Personal Care, Automotive and Electronics, among others.

We have the ability to supply Just In Time assembly lines.

The resins we use include nylon, glass-filled nylon, PBT, Polypropylene, ABS and TPU, among others; we also use any other Engineered Plastics that our clients may require.

## Solutions and Services

High or continuous volume production runs that will help our clients to meet the requirements of their continuous demand programs.

Low volume production runs that will satisfy the requirements of urgent material or not-forecasted production peaks, as well as lot production for special projects.

We also offer the reception of our customers molds to produce their pieces in any moment that their production schedule is full and their own injection machines are not enough.

We count with 7 plastic injection molding machines with capacities from 35 to 150 Tons.

Allied with our suppliers, we can support our customers for designing or re-designing their molds as well as their start of production of their new pieces.

We have a quality system that guarantees the traceability of the finished goods, this allow us the quick generation of corrective actions when required, as well as it also helps in the creation of lessons learned that enable the continuous improvement in our processes.

### Mission

AZ Potosina Plastics is a company dedicated to the injection of high performance plastic components.

### Vision

To be leaders in the market, giving our clients, actionists, suppliers and workers an honest and fair treatment based in shared values.

### Quality Policy

To supply our clients products and services with first time quality.

### Safety Policy

Safety is first and a shared responsibility.
